

# ***PENSKE*** **RACING SHOCKS**

## ***Short Track Head Valve Series Shock***

The Short Track Head Valve Series is a removable assembly that can be incorporated into the 7500 or 7600 series shock with little or no modifications. A head valve shock allows lower gas pressures, resulting in more grip and substantially reduced rod pressure. Utilizing a two-port piston design, the assembly can be valved to compliment any level of damping at the main piston.

A shock with the head valve system is easily adaptable to fit any vehicle specification, as they are available in a variety of shock lengths and are offered as an adjustable or sealed unit with the choice of a coilover or smooth body.

**AS-75PIHV.....\$ 80.00 / each**  
**Head Valve Assembly, NEW SHOCK**

**AS-75PIHV.....\$127.75 / each**  
**Head Valve Assembly, UPGRADE**

**Adjustable or Sealed**

**Coilover or Smooth Body**

**Gas Separator Piston**
